## M5 corridor expansion

The NSW Government proposes to expand the M5 – a vital corridor connecting Sydney's south and south west to the Sydney Airport, Port Botany and the city. The proposed M5 corridor expansion aims to reduce travel times for motorists using the M5 and ensure effective planning for the future demands of the corridor.

Initial submissions are welcome now and all interested individuals and organisations are invited to submit their comments. These submissions will help identify emerging issues for the proposed M5 corridor expansion and will help scope the environmental assessments. Submissions will close on 19 February 2010.
